# INDEX

## SECTION 1: INTRODUCTION

- Welcome to the Complete Fitness & Nutrition Program
- Purpose of This Program
- How This program Will Help You
- How to Use This Program (Step-by-Step)

## SECTION 2: WHO CAN FOLLOW THIS PROGRAM

- Ideal Candidates for This Program
- Age Group & Fitness Levels
- Medical Disclaimer & Safety Note

## SECTION 3: FITNESS GOALS & EXPECTATIONS

- Short-Term Goals (4–6 Weeks)
- Long-Term Goals (8–12 Weeks)
- Fat Loss vs Weight Loss (Simple Explanation)
- What Results to Expect & When

## SECTION 4: BODY ASSESSMENT & TRACKING

- How to Measure Weight, Waist & Hip
- Progress Tracking Guidelines
- Weekly Check-in System
- Common Progress Myths

## SECTION 5: Fat loss Journey

- How fat loss works
- How body uses fat for energy
- Energy storage & fat storage hierarchy
- Extreme workout + Low Food = Muscle Loss
- Correct way to do fat loss
- Why Very low Calories is bad

## SECTION 6: WORKOUT Section

- full body workout 2 set everything ( reps 15 to 20 )
- Weekly Workout Structure
- Day 1 – Full Body Fat Burn
- Day 2 – Lower Body + Core
- Day 3 – Upper Body + Abs
- Day 4 – Cardio & Fat Burner
- Day 5 – Abs & Core Focus
- Rest Day & Active Recovery

# INDEX

SECTION 7: NUTRITION PRINCIPLES

- Role of Nutrition in Fitness
- Calories Explained Simply
- Protein, Carbs & Fats Basics

SECTION 9: PROGRAM RULES & DISCLAIMER

- Safety Guidelines
- Medical Disclaimer
- Results Disclaimer

SECTION 8: DIET PLAN (INDIAN & PRACTICAL)

- Daily Meal Timing Guide
- Vegetarian Diet Plan
- Non-Vegetarian Diet Plan
- Lifestyle & Recovery Tips

SECTION 10: Client Transformation

SECTION 11: Our Certificate

SECTION 12: Support & Contact

# ABOUT COACH SURAJ AMBRALE

Hi, I’m Suraj Ambrale, a certified Personal Trainer and Nutritionist specializing in beginner fat loss and body transformation.I help beginners who feel confused about workouts, diets, and weight loss finally get clear direction, structured training, and sustainable nutrition plans that actually work.

My approach is simple:

- Science-based fat loss
- Beginner-friendly workout programs
- Sustainable nutrition (no crash diets)
- Habit-building for long-term transformation

I believe fitness should not feel complicated or extreme. With the right guidance, consistency, and mindset — anyone can transform their body and health.

Let’s transform your body the right way — step by step.

— Coach Suraj Ambrale

# WELCOME TO OUR FITNESS PROGRAM

Welcome to the Complete Fitness & Nutrition program. This program is specially designed for beginners and normal individuals who want to improve overall health, loose excess body fat, increase strength, and build a sustainable fitness lifestyle.

# PURPOSE OF THIS PROGRAM

The purpose of this kit is to simplify fitness and nutrition. No extreme workouts, no crash diets, and no complicated rules. This program focuses on consistency, balance, and long-term results.

— Coach Suraj Ambrale

# HOW THIS PROGRAM WILL HELP YOU

- Improve fitness and stamina
- Reduce body fat safely
- Build basic strength and muscle
- Tone Develop healthy daily habits

# HOW TO USE THIS PROGRAM(STEP-BY-STEP)

- Read the complete guide before starting
- Follow the workout plan as mentioned
- Stick to the nutrition principles
- Track progress weekly
- Stay consistent for at least 8–12 weeks

— Coach Suraj Ambrale

# WHO CAN FOLLOW THIS PROGRAM ?

## Ideal Candidates for This Program

- Beginners with no workout experience
- Office workers with sedentary lifestyle
- people looking for weight loss or general fitness

## Age Group & Fitness Levels

- This program is suitable for individuals aged 18–55 years with no major medical conditions.

## Medical Disclaimer & Safety Note

- Consult a doctor before starting this program if you have any medical conditions. Perform exercises with correct form to avoid injury.

— Coach Suraj Ambrale

# FITNESS GOALS & EXPECTATIONS

## Short-Term Goals (4–6 Weeks)

- Improved energy levels
- Better mobility and flexibility
- Initial fat loss

## Long-Term Goals (8–12 Weeks)

- Visible fat reduction
- Improved muscle tone
- Better endurance and posture

## Fat Loss vs Weight Loss

Weight loss is a reduction in total body weight, while fat loss focuses on reducing body fat and preserving muscle. Fat loss is the healthier goal.

## What Results to Expect & When

Results vary from person to person. Visible changes usually appear after 4–6 weeks with proper consistency.

— Coach Suraj Ambrale

# BODY ASSESSMENT & TRACKING

## How to Measure Weight, Waist & Hip

- Measure weight once per week
- Measure waist and hip using a tape
- Take progress photos every 2 weeks

## Progress Tracking Guidelines

Track energy levels, strength improvement, and consistency, not just scale weight.

## Weekly Check-in System

Review diet, workouts, sleep, and water intake every week

## Common Progress Myths

Daily weight changes are normal and do not reflect fat loss.

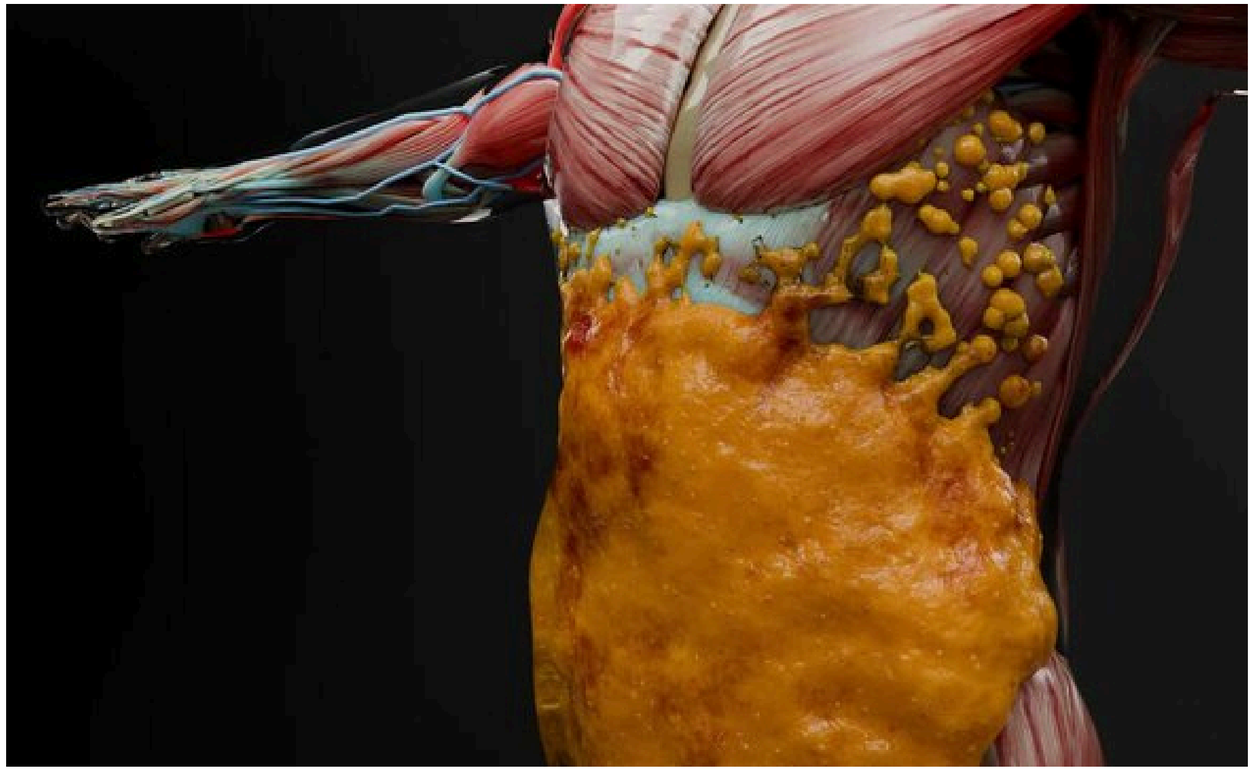
— Coach Suraj Ambrale

# 🔥 LET’S BEGIN YOUR🔥

# FAT LOSS JOURNEY!

— Coach Suraj Ambrale

# HOW FAT LOSS WORKS



Fat loss does not happen by magic.

Your body uses fat as energy when it needs fuel and does not get enough from food.

Your body gets energy from:

- Carbohydrates (carbs)
- Fats
- Proteins

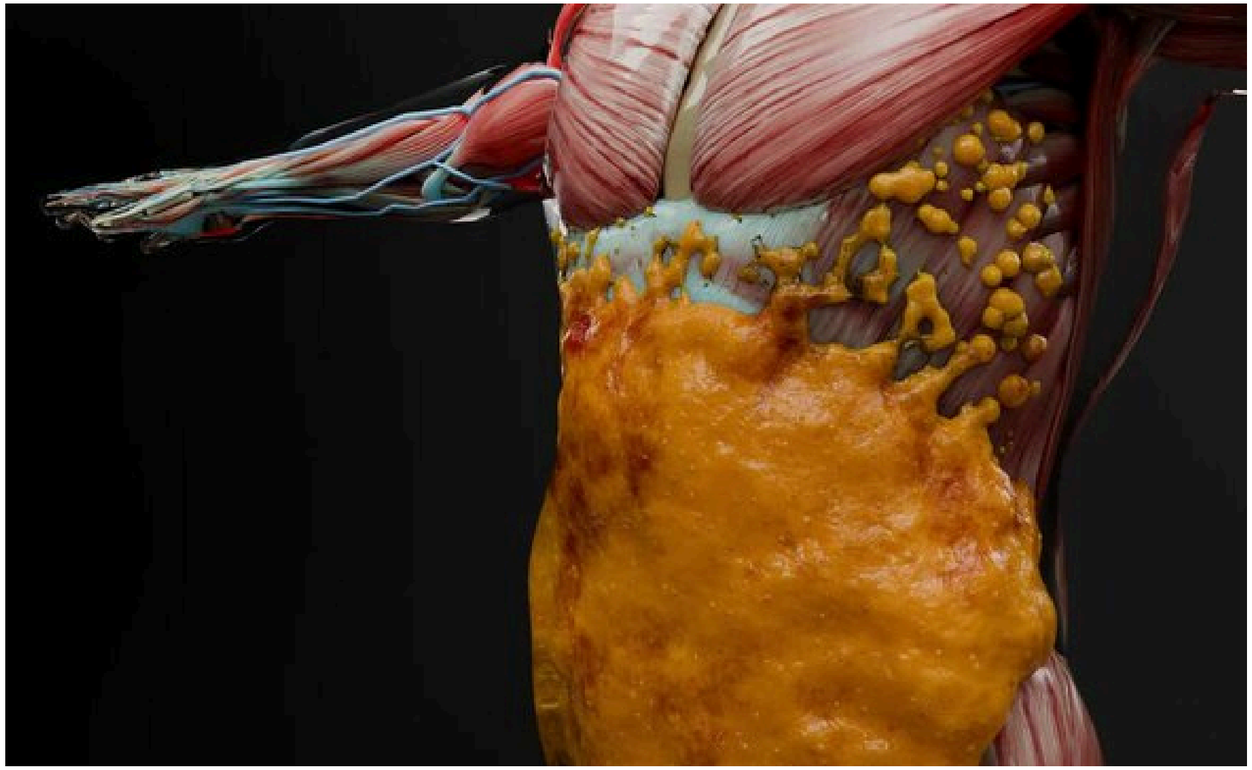
When you eat more calories than your body needs, the extra calories are stored as fat. When you eat fewer calories and move more, your body starts using stored fat for energy.

This is called calorie deficit.

Fat loss = Calories In < Calories Out

— Coach Suraj Ambrale

# HOW BODY USES FAT FOR ENERGY



Your body always needs energy to:

- Walk
- Breath
- Think
- Exercise
- Work

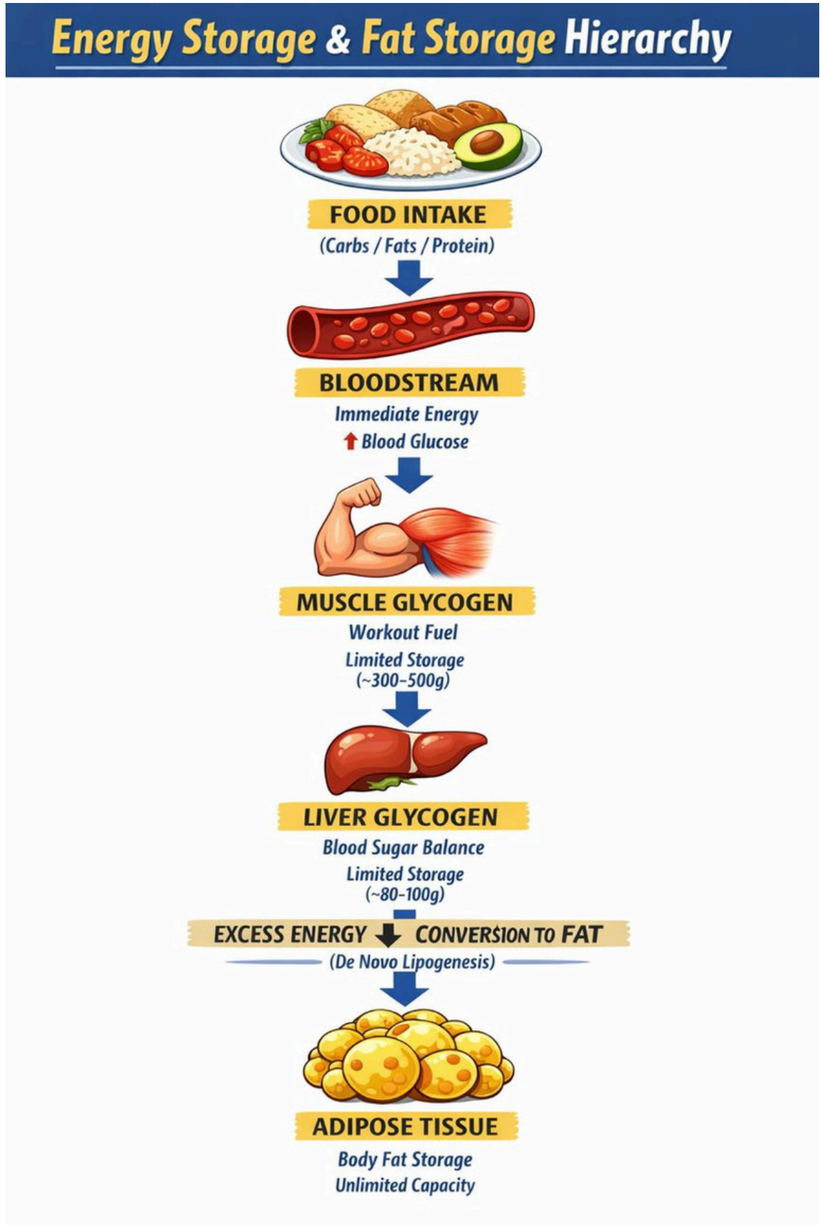
When food is not enough, the body looks for backup fuel.
That backup fuel is stored fat.

So the process is:
Food energy → Used first
If food energy is less → Body uses fat energy

This is how fat is burned.

— Coach Suraj Ambrale

# ENERGY STORAGE AND  FAT STORAGE HIERARCHY

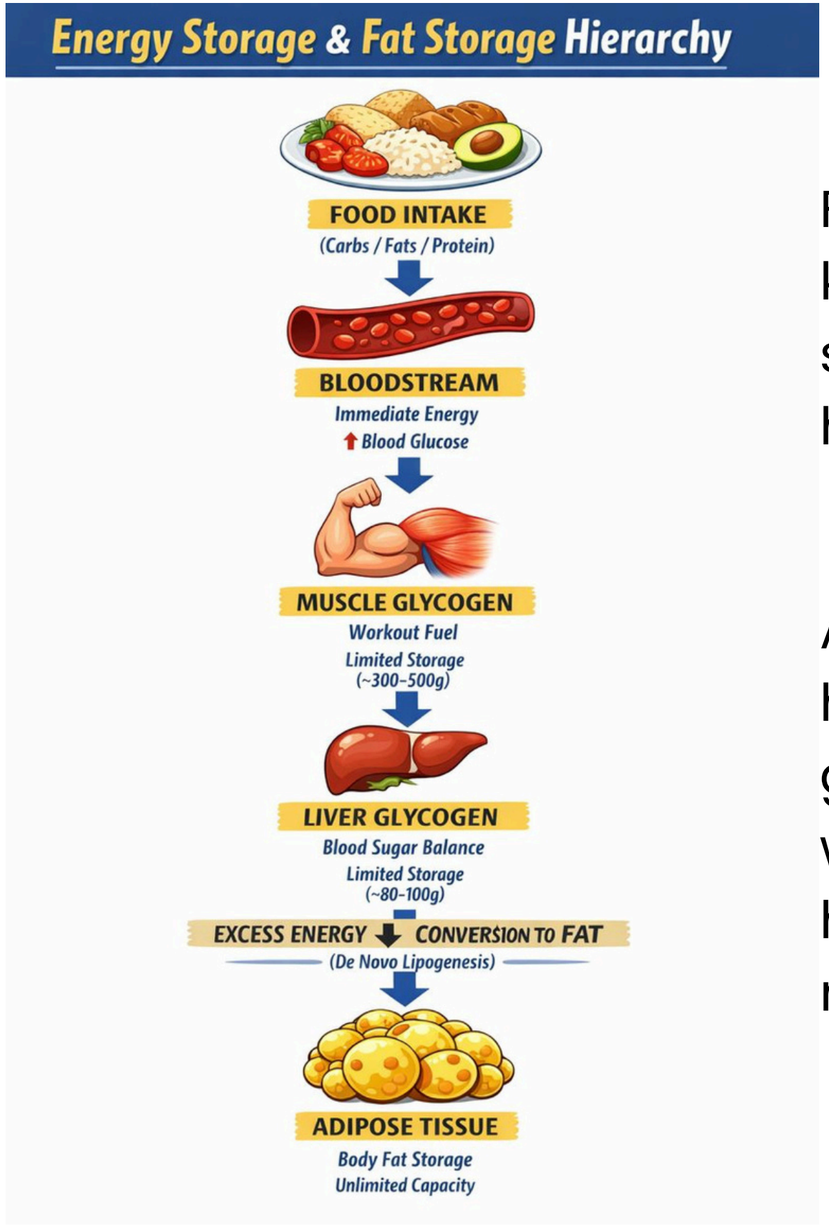


Energy Storage & Fat Storage Hierarchy – Description.

Human body energy ko randomly store nahi karti, balki ek priority system (hierarchy) follow karti hai. Jab bhi hum food consume karte hain especially carbohydrates, fats aur proteins  body pehle immediate energy needs ko fulfill karti hai, phir limited storage tanks fill karti hai, aur last me extra energy ko body fat ke form me store karti hai.

— Coach Suraj Ambrale

# ENERGY STORAGE AND FAT STORAGE HIERARCHY



## Bloodstream (Immediate Energy Source)

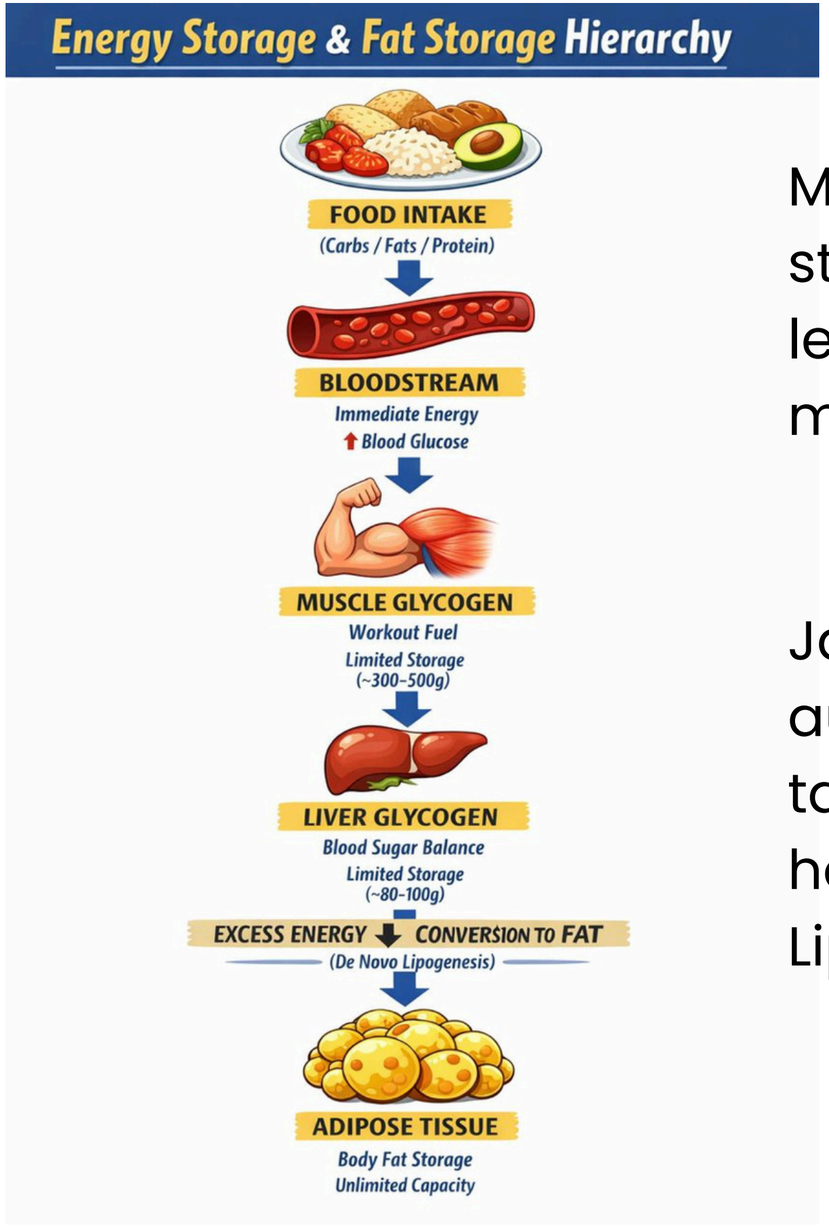
Food digestion ke baad nutrients bloodstream me enter karte hain, jisse blood glucose level increase hota hai. Body sabse pehle isi circulating glucose ko energy ke liye use karti hai taaki brain aur muscles ko instant fuel mil sake.

## Muscle Glycogen Storage

Agar bloodstream me extra glucose available ho, to insulin hormone us glucose ko muscles me store kar deta hai glycogen ke form me. Ye glycogen physical activity, workouts aur daily movement ke liye primary fuel source hota hai. Muscle glycogen storage limited hoti hai aur regular exercise se empty bhi hoti rehti hai.

— Coach Suraj Ambrale

# ENERGY STORAGE AND FAT STORAGE HIERARCHY



## Liver Glycogen Storage

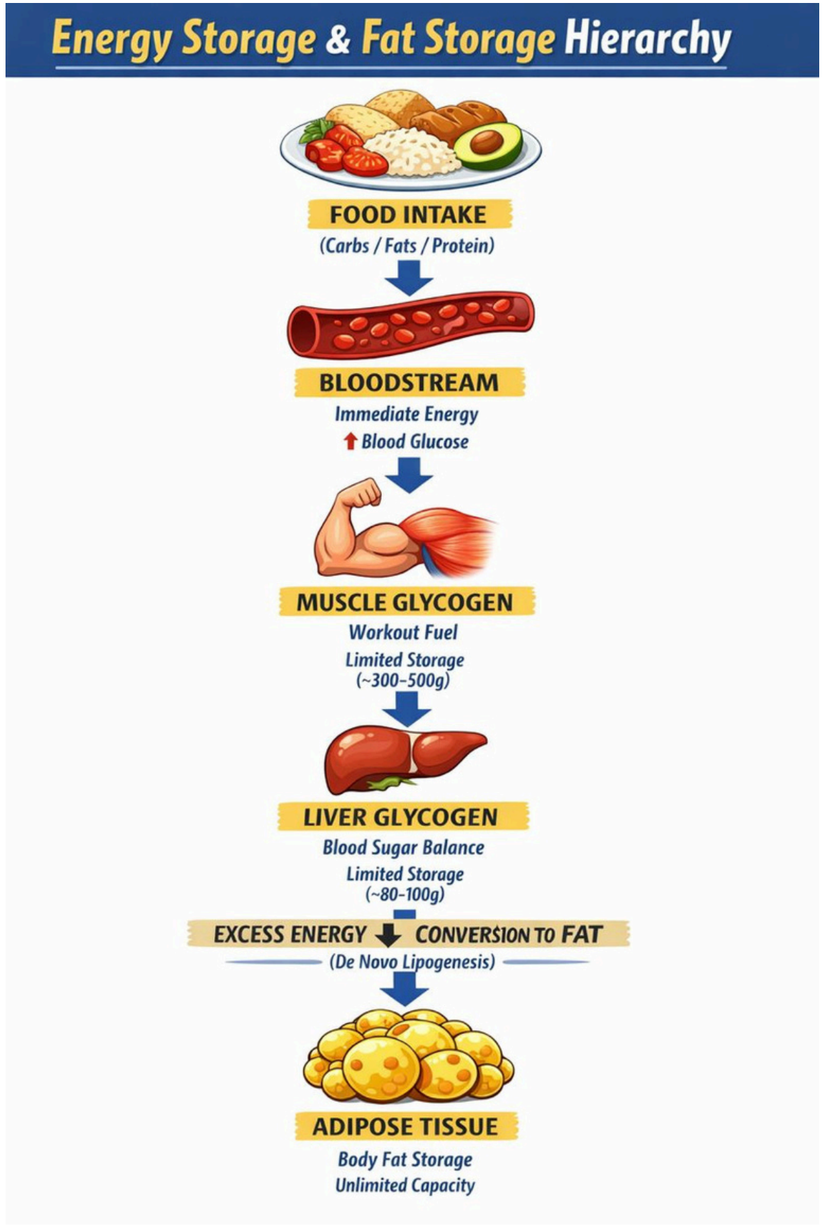
Muscles ke baad glucose liver me glycogen ke form me store hota hai. Liver glycogen ka main role blood sugar levels ko stable rakhna hai, especially fasting, sleep ya meals ke beech ke time me.

## Conversion of Excess Energy (De Novo Lipogenesis)

Jab muscle aur liver glycogen stores full ho jaate hain aur energy intake body ki requirement se zyada hoti hai, tab excess carbohydrates fat molecules me convert hone lagte hain. Is metabolic process ko De Novo Lipogenesis kaha jata hai.

— Coach Suraj Ambrale

# ENERGY STORAGE AND FAT STORAGE HIERARCHY



## Adipose Tissue (Body Fat Storage)

Finally, extra energy triglycerides ke form me adipose tissue (fat cells) me store hoti hai. Ye body ka long-term energy reserve system hai aur iski storage capacity virtually unlimited hoti hai. Continuous calorie surplus isi stage par body fat gain ka main reason banta hai.

**“BODY FAT IS NOT THE FIRST CHOICE OF STORAGE IT IS THE LAST OPTION WHEN ALL ENERGY TANKS ARE ALREADY FULL.”**

— Coach Suraj Ambrale

# EXTREME WORKOUT + LOW FOOD = MUSCLE LOSS

When calories are too low and training is too hard:

- **Body uses muscle for energy**
- **Strength goes down**
- **Shape becomes flat**
- **You look skinny, not fit**

🔥**Goal is fat loss, not muscle loss**🔥

— Coach Suraj Ambrale

# CORRECT WAY TO DO FAT LOSS

## The right method is:

- Moderate workout
- High protein diet
- Controlled calories
- Proper sleep
- Consistency

## This gives:

- Fat loss
- Muscle protection
- Good shape
- Better health

— Coach Suraj Ambrale

# WHY VERY LOW CALORIES IS BAD

**Some people eat:**

- Only fruits
- Only salads
- Skip meals
- Starve themselves

**This causes:**

- Low energy
- Hair fall
- Weakness
- Slow fat loss
- Hormonal problems

## Fat loss should be:

✓ **Smart** ✓ **Balanced** ✓ **Sustainable**

— Coach Suraj Ambrale

# NOW WE ARE ENTERING INTO

# WORKOUT SECTION

## NOW YOU WILL KNOW HOW TO DO GYM WORKOUT AS WELL AS HOME

if any assistance needed , just text me on whatsapp i will get back to you.

— Coach Suraj Ambrale

# FULL BODY WORKOUT 2 SET EVERYTHING ( REPS 15 TO 20 ) (GYM WORKOUT)

01 Warm up

02 Squats

03 Leg press

04 Calf raise

05 Seated cable row

06 Flat bench press

07 Super man

08 Crunches

09 Leg raise

10 Stretching

— Coach Suraj Ambrale

# HOME WORKOUT PLAN

## DAY 1 – FULL BODY FAT BURN

- Bodyweight Squats – 3 sets × 15 reps
- Push-ups (knees if needed) – 3 × 10
- Jumping Jacks – 3 × 30 sec
- Glute Bridge – 3 × 15
- Plank – 3 × 30 sec

## DAY 2 – Lower Body + Core

- Lunges – 3 × 10 each leg
- Wall Sit – 3 × 30–40 sec
- Mountain Climbers – 3 × 30 sec
- Leg Raises – 3 × 12
- Heel Touches – 3 × 20

— Coach Suraj Ambrale

# HOME WORKOUT PLAN

## DAY 3 – Upper Body + Abs

- PUSH-UPS – 3 × 10–12
- CHAIR DIPS – 3 × 12
- ARM CIRCLES – 3 × 30 SEC
- RUSSIAN TWIST – 3 × 20
- PLANK SHOULDER TAP – 3 × 10 EACH SIDE

## DAY 4 – Cardio + Fat Burner

- High Knees – 3 × 30 sec
- Jump Squats – 3 × 12
- Burpees – 3 × 8–10
- Skipping (imaginary rope) – 3 × 1 min
- Side Jumps – 3 × 30 sec

— Coach Suraj Ambrale

# HOME WORKOUT PLAN

## DAY 5 – Abs + Core Focus

- Leg Raises – 3 × 12
- Bicycle Crunch – 3 × 20
- Plank – 3 × 40 sec
- Flutter Kicks – 3 × 20
- Sit-ups – 3 × 12

## Important Instructions

- Breathe properly during exercises
- Do not rush, focus on form
- If pain (not muscle burn) → stop
- Drink water during workout
- Be consistent

— Coach Suraj Ambrale

# NUTRITION PRINCIPLES

Nutrition plays a major role in fitness results. Avoid extreme dieting. Focus on balanced meals with adequate protein, complex carbohydrates, healthy fats, vitamins, and minerals

- Eat 3 main meals and 1–2 healthy snacks daily
- Include protein in every meal (dal, eggs, curd, paneer, chicken, fish)
- Choose whole grains instead of refined carbs
- Eat seasonal fruits and green vegetables
- Drink at least 2.5–3 liters of water daily
- Avoid sugary drinks, junk food, and excess fried items

— Coach Suraj Ambrale

# 🎉 CONGRATULATIONS! YOU’VE TAKEN THE FIRST STEP TOWARDS YOUR TRANSFORMATION 🎉

**Your Personalized Diet Plan is ready on the NEXT PAGE ➡️**

— Coach Suraj Ambrale

# DIET WITHOUT DENSE AND LIQUID CALORIES

- 8:30 = warm water + few drops of lemon + half tablespoon cinnamon powder
- **8:45 = 1 fruit (no juice)**
- **9:30 = upma / poha + (add lot of veggies ) + 1 cup of cow milk (no sugar) or 2 idlis + sambhar / wheat flakes / oats + milk**
- **12:30 = Butter Milk**
- **1:30 = bhakri ( jowari / bajra ) + 1 bowl of veggies sabji / dal + salad + curd**
- **4:30 = green tea + handfull roasted chana / makhana**
- **7:30 = butter milk + chia seed / sabja**
- **9:00 = bhakri + veggies sabji + salad**

Note: For both lunch and dinner, include 100 gm of any one protein source such as chicken breast, paneer, fish, soya beans, rajma, chana, eggs, or any other preferred protein option to ensure adequate daily protein intake.

If feel hungry then use one glass cow milk (no sugar). Limit these foods instead of completely avoiding: potato , coconut , fruit juice , soft drink , rice , butter , cheese , maida , fried.

— Coach Suraj Ambral

TOGETHER in RECOVERY

# LIFESTYLE & RECOVERY TIPS

- Sleep 7–8 hours every night for recovery
- Avoid sitting continuously for long hours
- Stay hydrated (2.5–3 liters water daily)
- Walk minimum 5,000–10,000 steps daily
- Stretch daily to improve flexibility
- Limit junk food & processed sugar
- Take 1–2 rest days per week
- Manage stress through breathing or meditation
- Get 10–15 minutes sunlight daily
- Track weight, measurements, and energy levels weekly

— Coach Suraj Ambrale

# IMPORTANT DISCLAIMER

This fitness program is for educational purposes only. Participation is voluntary and at your own risk. Consult a doctor before starting this program if you have any medical condition or injury. Stop immediately if you experience pain, dizziness, or discomfort. Results may vary depending on individual body type, consistency, and lifestyle.
